

## Ideate BIMLink - Common Workflows for MEP Engineers

Task	Task Description	Task Frequency Per Project	Average Time Saved per Project (HRS)*
<b>Manage MEP Schedule Data</b>	Use Microsoft Excel instead of Revit for various MEP editing tasks, increasing speed and accuracy of model data editing and management	Daily	25.0
<b>Coordinate Spaces and Rooms</b>	Coordinate room-based data with the space elements. Think Space Naming tool and much more	4-6x per project	4.0
<b>Assign and Manage Space Types</b>	Easily assign the Space Type to spaces without the need to manually sleuth through many dialog boxes to pick the Space Type assignment	1-2x per project	4.0
<b>QC Device Elevation</b>	Audit and fix the elevation values of devices	1-3x per project	4.0
<b>Publish Pipe Coordinate Data</b>	Publish coordinate data into a shared parameter, so that data can be displayed in a schedule or in a tag	1-3x per project	6.0
<b>Name Circuits</b>	Use a variety of parameters to better control the names for the circuits	1-3x per project	6.0
<b>Manage MEP Fab Part Data</b>	Go beyond the Revit schedule data for deeper editing access of MEP Fab Part data	4-6x per project	6.0
