Common Workflows
for MEP Engineers

Task	Task Description	Task Frequency per Project	Average Time Saved per Project (HRS)*
Manage MEP Schedule Data	Use Microsoft Excel instead of Revit for various MEP editing tasks, increasing speed and accuracy of model data editing and management	Daily	25.0
Coordinate Spaces and Rooms	Coordinate room-based data with the space elements. Think Space Naming tool and much more	4-6x per project	4.0
Assign and Manage Space Types	Easily assign the Space Type to spaces without the need to manually sleuth through many dialog boxes to pick the Space Type assignment	1-2x per project	4.0
QC Device Elevation	Audit and fix the elevation values of devices	1-3x per project	4.0
Publish Pipe Coordinate Data	Publish coordinate data into a shared parameter, so that data can be displayed in a schedule or in a tag	1-3x per project	6.0
Name Circuits	Use a variety of parameters to better control the names for the circuits	1-3x per project	6.0
Manage MEP Fab Part Data	Go beyond the Revit schedule data for deeper editing access of MEP Fab Part data	4-6x per project	6.0
