

For a given project, please select the typical tasks your office performs from both columns below.

Common Workflows - All Disciplines

Discipline Specific

- Sheets**
- Create Sheets
 - Edit Sheets
 - Manage Sheet Indexes
- Views**
- Create Views
 - Audit Views
- Revisions**
- Complete Sheet Revisions and Sheet Issuances
 - Manage Revisions and Cloud Information
- General**
- Manage OVERALL Schedule Data
 - Create NEW Types and Elements
 - Develop Project Health Checks
 - Perform Type Swapping (General)
 - Schedule Properties not Natively Reported in Revit
 - Perform General QA/QC Reviews
 - Review and Map Phasing
 - View and Name Sheets - General
 - Manipulate Project Standards
 - Translate Text to Other Languages
 - Coordinate Data - General
 - Check and Compare Models
 - Review Who Created and Edited Elements
 - Organize Worksets
 - Prep for COBie Deliverables

- Architects and Interior Designers**
- Pre-Design
 - Create NEW Rooms and Areas
 - Perform Life-Safety and Occupancy Calculations
 - Gather BOMA Area Data
 - Count Plumbing Fixtures
 - Modify Existing Room and Area Data
 - Coordinate Data with other Disciplines
 - QA/QC Door Ratings Against Wall Ratings
 - Name Views
 - QA/QC Model Elements
 - Review and Edit Doors and Hardware
 - Manage Interior Finish Data
- Structural Engineers**
- Swap Structural Framing Instances
 - Audit General Structural Framing
 - Coordinate Data Extraction
 - QA/QC Level and Grid Comparisons
 - Coordinate Slab Edges
 - Push Column Analytical Data into Tables
 - Review Rebar Shapes
 - Manage Generic Annotations - Bolt and Weld Schedule Data
- MEP Engineers**
- Manage MEP Schedule Data
 - Coordinate Spaces and Rooms
 - Assign and Manage Space Types
 - Create NEW Spaces from Linked Rooms
 - QC Device Elevation
 - Publish Pipe Coordinate Data
 - Name Circuits
 - Manage MEP Fabrication Part Data
- Construction and Design/Build Professionals**
- Assign QTO and Assembly Codes
 - Perform Type Swapping
 - Coordinate Survey and Height Data for VDC Use
 - Gather Data for FM Software
 - Track Devices

User-Defined Tasks (enter the tasks below and check)

Total Number of Tasks Selected from Above:

We recognize that the data inputs and outputs below are rough estimates. Do your best to come up with a total average on how often all of the tasks selected above are performed and the average time it takes to perform each task.

Input how often each task is performed on a project

Input estimated average time savings per task (mins) mins

Your approximate total number of project tasks using Ideate BIMLink

Your approximate time savings using Ideate BIMLink per project (hrs.) hrs

Optional: Approximate Cost Savings per Project and for All Projects Annually

Input average number of annual projects

Input average hourly billing rate of your Revit users /hr

Your total average annual tasks performed using Ideate BIMLink

Your total average cost savings per project using Ideate BIMLink

Your total average annual savings using Ideate BIMLink
